

May 11, 2018

Dear Dynatronics Customer,

With the speed at which technological advancements have been made over the past few years, digital and computerized components, as well as electronic parts have become obsolete at an unexpected, accelerated rate. As a result, many critical components that were used in the manufacturing of our devices have aged to a point where they are no longer available - they have reached their end of life.

As a result, starting July 1, 2018 Dynatronics we will no longer be able to repair or service the following devices and accessories:

	<p>Dynatron® 50 plus Series (950+,850+, 650+, 550+, 150+, 525, 125) and all accessories – including soundheads Manufactured 1996-2013</p>
	<p>Solaris Series (709, 708, 706, 705, 702, 701, XP,XPB,D880,D881,D890 & D405) and all accessories – including soundheads Manufactured 2003-2014</p>
	<p>Dynatron X Series (X3) and all accessories Manufactured 2005-2016</p>
	<p>Dynatron iBox Manufactured 2005-2011</p>

We apologize for any inconvenience that these events may cause. Please contact your Dynatronics' Representative, who will be able to go over all of your options. Be assured, we value your loyalty to the Dynatronics family of products and our relationship with you. We appreciate your business and look forward to helping you build for the future.

Sincerely,

Dynatronics Management
Therapy Products Division
